

DCUBE

DATA DRIVEN DECISIONS

The #1 most automated services solutions company in the compliance analytics, cyber notification and information governance space.

eDiscovery Services

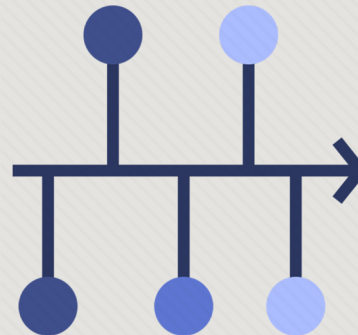

eDiscovery analytics are core to almost every project we do.

Legal hold, processing, hosting, analytics and managed document review are all possible with the most price competitive eDiscovery services on the market.

We know that off the shelf solutions don't always fit the need and for those scenarios, we have a team of eDiscovery data scientists who are able to create the most complex algorithms when required.

Timeline Creation

We know the importance of understanding the facts of a case in a chronological order. Our timeline creation service offers you the latest technologies and analysis to clearly identify and lay out the critical points in your data in a visual dynamically updated visualization.
